

Peter Goldishman 2016 Speech

The Vema Seamount Authority 2016 speech, that marked the 10th Anniversary of the Sovereignty of the Kingdom of Mount Vema.

The Full Address by the Monarch of Mount Vema:

Members of the Mount Vema Community, and members of my family and friends. There have never been enough words to express my thanks for the great honor, for the loyalty and your faith in what we do as a community. I'll continue to do my utmost to be deserving of your trust.

This is the 10th anniversary, that marks that day in history, when I Peter J Goldishman, in 2006, declared Vema Seamount a Sovereign territory.

When Vema Seamount was introduced to me for the first time, it was never my intention to build a nation, let alone a Kingdom. I first, like many others who knew about Vema Seamount before, had no idea what to do with it, and never really understood its true potential.

However, I soon realized, that it comes a time, when one needs to stand up for what feels right. It felt that it was the natural place, at the right time, to build not just a city but a sovereign nation. I could have made it a republic, but to build a republic, I needed more people, an asset that I could not have at the time. So, I decided to work with what I had. Claim the territory and administer it as a monarchy. It was at the time, the most practical option going forward.

That year, in 2006 when it all began, there were only a few of us. Today we are a much larger community with members across the Globe who, never hesitated to rally to the aid of the Planed Earth and mankind, whenever the world called for help.

Today, so much has changed and yet we stand together and stronger than we did 10 years ago. I must admit that the journey has been hard, and that we have disappointed, so many people in the process, for which I deeply apologize, and I hope they do understand that we are not done yet. There is much to be done.

I ask for forgiveness for any upset I have personally caused to anyone, due to any wrong decision, I have made in the process of exercising my duties. When any of such decision was a cause for monetary loss, compensation, will be made in due course.

To our enemies, especially those who hate to see us prospering, our community is not given to looking backward, in this Universe of ours there is always a better tomorrow for everyone, regardless of the color of their skin, background or where they come from. On this journey, under God, there will be no turning back or hesitation, on the road to build a city, with an economy rich in dignity and abundant with opportunity for all.

The community of the Kingdom of Mount Vema, this year renews its faith, to strive with all our strength towards building an orderly society, where men and women are free to follow their dreams, and reach as far as talents will permit.

The most noble aspiration of the human spirit worldwide, is the right for self-determination, those inalienable rights that make for human dignity. Although there are still many mountains to climb we will not rest, until every member of our community, enjoys the fullness of freedom dignity and opportunity as our birth right.

It is also our responsibility to ensure that we can defend ourselves and our marine life, with the latest defense capabilities and there must be no wavering by us, nor any doubts by others that the Kingdom of Mount Vema will meet its responsibilities to pay for the best protection and to remain secure and at peace.

A few hundreds of years ago, two founding fathers, across the Atlantic, a Boston lawyer named Adams and a Virginia planter named Jefferson, dared to think they could start the world over again, and built the foundations of what is today the United States of America. It is in that spirit, that our community under God will work, with that level of courage and greatness, to do what we know is right and do it with all our might. This is a time of opportunities, a time to start the world over again.

That determination and belief that the future of mankind should be worthy of its past, is what makes Mount Vema, this extraordinary Christian community of migrants in search for a fair, just and a better tomorrow, so, every member black and white, with our fellow residents of this Universe, can dream and live the dream, and those who seek work, can find work.

This year, the time has come for the great economic drive, to tear down barriers set by politic ideologies and empower the spirit of enterprise, in the most distressed areas of our Universe, together with other nations, we can do this and do it we must.

God bless you and may God bless Mount Vema
